Symbols and other usages

The following standard symbols are used in publications of the Tasmanian Office of the Bureau:

ASIC	Australian Standard Industrial Classification
M	males
F	females
P	persons
n.a.	not available
n.e.c.	not elsewhere classified
n.e.i.	not elsewhere included
n.p.	not available for separate publication, but included in totals where applicable
n.y.a.	not yet available
p	preliminary --- figure or series subject to revision
r	figure or series revised since previous issue
s	subject to sampling variability too high for most practical purposes
..	not applicable
—	nil or rounded to zero
---	break in continuity of series (where a line is drawn between two consecutive figures in the same column, or alongside two or more figures in consecutive columns)
(M)	Municipality
(C)	City

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

Values are shown in Australian currency.

Commentary

Employment

The Australian and State *trend series* comparisons, shown on page 25, indicate that there was an increase of 3.1 per cent in Tasmania's employment over the year to March 1994. The other Australian States also showed a *trend series* increase in employment over this twelve months' period. The largest percentage increase in employment was in Western Australia, where employment increased 4.0 per cent. The next highest increase in employment was in Queensland (3.9 per cent), followed by NSW (3.6 per cent), Victoria (0.9 per cent), and South Australia (0.4 per cent).

Compared with March 1993, regional estimates of *unadjusted* employment in March 1994 showed an increase of 3900 to 95 800 in the Hobart and Southern Statistical Division. Employment in the Mersey-Lyell Statistical Division increased by 200 to 43 300. In the Northern Statistical Division employment decreased to 56 100 compared with 56 500 in March 1993.

(See tables 3-8, pages 2-7.)

Unemployment

The Tasmanian *trend series* estimate of 26 200 unemployed persons in March 1994 was a decrease of 700 on the figure for March 1993 of 26 900. The *trend series* estimate of the unemployment rate of 11.8 per cent in March 1994 was a decrease in the *trend series* estimate of the unemployment rate of 12.3 per cent in March 1993. (See tables 3-8, pages 2-7.)

The Labour Force

In March 1994 there was an *unadjusted* estimate of 365 800 civilian Tasmanians aged 15 or more. There were an estimated 222 900 persons (based on *trend series* estimates) in the labour force. The *trend series* estimate of the labour force participation rate in March 1994 was 60.9 per cent, compared with the figure of 59.9 per cent in March 1993.

For males, the *trend series* estimate of participation rate was 72.7 per cent, compared with 71.6 per cent for March 1993. For females, the *trend series* participation rate was 49.5 per cent, compared with 48.5 per cent in March 1993.

(See table 3, page 2.)

Employed Wage and Salary Earners

In August 1993 there were approximately 150 600 employed wage and salary earners in Tasmania. This compares with approximately 151 400 in August 1991.

In August 1993 the Tasmanian public sector accounted for 31.9 per cent of all employed wage and salary earners. In the Tasmanian economy, the category Community services had the highest industry representation — 29.3 per cent — compared with the equivalent figure of 26.7 per cent recorded in August 1991. The next highest industry grouping Wholesale trade and Retail trade (20.7 per cent, compared with 18.6 per cent in August 1991) and Manufacturing (14.4 per cent, compared with 15.7 per cent in August 1991).

In August 1993, women made up 47.2 per cent of all employed wage and salary earners. In August 1991, the equivalent figure was 44.7 per cent.
(See table 9, page 8.)

Award Rates of Pay Indexes

The annual movement from February 1993 to February 1994 of weekly award rates of pay indexes for Tasmania rose by 0.9 per cent for full-time adult females and by 2.0 per cent for full-time adult males. For Australia, the figures were 1.1 per cent for females and 0.9 per cent for males.

For full-time adult female employees in Tasmania, the largest industry increases over this 12 month period occurred in Manufacturing (2.3 per cent), Wholesale and retail trade (2.3 per cent), and Recreation, personal and other services (2.3 per cent).

For the same period for full-time adult male employees in Tasmania, the largest industry increases occurred in Public administration and defence (11.5), and Recreation, personal and other services (2.3 per cent).

The largest occupation increases over the 12 months ended February 1994 for full-time adult female employees occurred in Plant and machine operators, and drivers (2.4 per cent), and Tradespersons (1.8 per cent).

For full-time adult male employees the largest occupation increases over the period occurred in Labourers and related workers (3.8 per cent), and Plant and machine operators, and drivers (3.0 per cent).

(See table 14, page 10.)

Consumer Price Index

The release of the March Quarter CPI showed Hobart recording the highest annual increase of all capital cities.

The 2.6 per cent recorded for Hobart for the 12 months ending March 1994 was significantly above the 1.4 per cent recorded for the weighted average of all eight capitals. The next highest capital was Perth at 2.1 per cent, with Sydney the lowest at 0.8 per cent.

The major groups contributing to the annual increase in Hobart were Tobacco and Alcohol, Health and Personal Care and Food. These recorded rises of 14.9, 6.5 and 3.3 per cent respectively. Minor offsetting decreases of 2.1 and 0.7 per cent were recorded for the Housing and Clothing groups.

The only groups to record lower increases in Hobart than nationally were Housing, Transportation and Recreation and Education.

The quarterly increase for Hobart of 0.3 per cent was slightly lower than the 0.4 per cent recorded for the weighted average of all eight capital cities. The major contributors to the quarterly movement in Hobart were pharmaceuticals, education fees, cigarettes and tobacco and household non-durables. Partially offsetting decreases were evident in holiday travel and accommodation in Australia, entertainment, petrol and house repairs and maintenance.

Consumer Price Index, March Quarter 1994, ABS catalogue no. 6401.0, released on 27 April 1994, \$12.00

State Government Outlays And Public Debt

Outlays for all purposes by the Tasmanian State Government (consolidated total of General Government and Public Trading Enterprises) in 1992-93 totalled \$2249 million. The purposes involving the largest outlays were: education at \$510 million

(23 per cent of the total), public debt servicing (interest payments) at \$488 million (22 per cent), health with \$338 million (17 per cent), and transport and communications with \$174 million (8 per cent).

The figure for net interest (interest paid minus interest received) was \$366 million. General government paid \$147 million of this net figure, and the remainder, \$219 million, was paid by the Public Trading Enterprises (the majority of which was debt servicing by the HEC). The \$147 million net interest paid by general government represented 8 per cent of general government non-interest revenue. Comparing this figure with the corresponding one for other States, Tasmania is below both Victoria (13 per cent) and South Australia (9 per cent). However, it is above Western Australia (7 per cent) and New South Wales (6 per cent). Queensland received more interest than it paid, and therefore did not require any non-interest revenue to meet its interest payments.

Government Finance Statistics Australia 1992-93, ABS catalogue no. 5512.0, released on 14 April 1994, \$30.00

Livestock Slaughtering

All slaughterings of animals for meat production increased between February and March 1994.

The largest increase was for cattle, where numbers slaughtered rose by just over 34 per cent, from 14 500 in February to 19 500 in March, which was similar to March 1993, when 19 000 were slaughtered.

The smallest increase was reported for sheep, with numbers slaughtered increasing from 60 400 in February to 68 600 in March. However, this was a rise of nearly 14 per cent, and an increase of just over 27 per cent on the 53 800 reported in March 1993. Slaughterings of lambs increased by over 30 per cent, from 38 100 in February to 49 000 in March. The March 1994 figure was nearly 34 per cent greater than the 36 600 recorded in March 1993. Slaughterings for both sheep and lambs were the highest reported over the last twelve months.

There was a 24.2 per cent rise in the numbers of pigs slaughtered, from 6600 in February to 8200 in March 1994, just over nine percent more than the March 1993 figure of 7500.

(See table 20, page 16.)

Building Approvals

There were 344 new dwelling units approved during February 1994 in Tasmania, the same number as in January 1994, but a 60 per cent increase on the February 1993 figure of 215.

For the twelve months ended February 1994 there were 4285 new dwelling units approved, six per cent higher than the 4059 units recorded for the previous corresponding twelve months.

The latest monthly trend estimates for the number of dwelling units approved show a continuing increase in the estimate over the past eleven months.

The value of new residential building approved, at current prices, for February 1994 was \$23.8 million, compared with \$26.0 million in January 1994 and \$16.0 million in February 1993.

The value of all buildings approved, at current prices, for February 1994 was \$32.7 million, compared with \$40.9 million in January 1994 and \$30.8 million in February 1993.

(See table 27, page 19.)

Retail

The trend estimate for turnover of retail and service establishments in Tasmania for February 1994 was \$216.3 million, a 4.2 per cent increase on the February 1993 figure of \$207.5 million. The estimate has shown weak growth over recent months. For the last three months the growth rate has been around 0.2 per cent per month. The trend estimate increased by 0.1 per cent from January 1994 to February 1994.

The estimate of turnover for February 1994, for Australia (\$8474.0 million), was more than five per cent higher than for February 1993. The estimate indicates a slight easing in the growth rate evident over recent months.

In original terms, the estimate of retail turnover in February 1994, for Tasmania, was \$197.6 million, a four per cent decrease on the figure recorded for January 1993. (See table 35, page 23.)

New Motor Vehicle Registrations

There were 967 new motor vehicles (excluding motorcycles) registered in Tasmania during March 1994. This was four per cent more than for February (929), but a decrease of over 10 per cent on the number registered for March 1993.

Registrations for the twelve months ended March 1994 (12 561) were more than three per cent higher than for the twelve months ended February 1993. (See table 34, page 23.)

Private Mineral Exploration

Total expenditure on mineral exploration (other than for petroleum) in Tasmania, for December quarter 1993, was \$2.0 million. This figure nearly 18 per cent higher than the figure recorded for the September quarter 1993.

Expenditure for exploration of copper, lead, zinc, silver, nickel and cobalt accounted for 70 per cent of the total amount. Another 20 per cent was spent on gold exploration.

Actual and Expected Private Mineral Exploration, Australia, December Quarter 1993, ABS catalogue no. 8412.0, released on 6 April 1994, \$10.50

February	24.1	16.6	12.3	94.3	27.3	8.1	n.p.	3 079

(a) Source: Australian Dairy Corporation. (b) Changing productivity per staff-hour makes these indicators unsatisfactory for long-term comparisons. (c) For sale as such; excludes production for use within the same enterprise. (d) Output from selected establishments covering the smelting and refining of ferro-alloys, zinc and aluminium. The weighting pattern is based on the establishments' value added as derived from the 1979-80 Manufacturing Census. For multi-product establishments, value added was apportioned to products on the basis of gross receipts from each product. (e) Includes the whole milk equivalent of farm cream intake. (f) Includes butter equivalent of butter oil. (g) Includes spinning, weaving and carpetmaking. Reported by establishments which manufacture textiles only, or manufacture clothing and textiles in the one plant. (h) Production low due to annual close-down.

(a) Due to changes to the *Banking Act 1959* in December 1989, which removed the distinction between trading and savings banks, figures previously published in this table are no longer comparable with those shown above. (b) Details are the averages of weekly figures for each month. The figures are derived from returns submitted by banks authorised under the *Banking Act* together with similar returns voluntarily submitted by the State banks; they exclude the Reserve Bank. (c) Excludes non-resident loans. (d) Affected by reclassification of certain accounts.

1992 -- December	65 339	385	16 538	82 262	66 297	--
1993 -- October	57 362	434	7 965	65 761	65 042	--
November	59 592	393	8 561	68 546	66 733	--
December	74 056	391	15 348	89 795	72 362	--

(a) The following persons are not included in these statistics: passengers under three years of age accompanied by an adult; passengers travelling on chartered flights with minor carriers; passengers travelling on private or VIP flights; and passengers from or departing for overseas other than direct flights to New Zealand. (b) The proportion of departing passengers who were visitors was shown to be about 58 per cent in the 1981 Tasmanian Visitor Survey, 55 per cent in the 1984 Tasmanian Visitor Survey, about 53 per cent in the 1986 Tasmanian Visitor Survey and almost 65 per cent in the 1990 Tasmanian Visitor Survey and about 57 per cent in the 1992 Tasmanian Visitor Survey

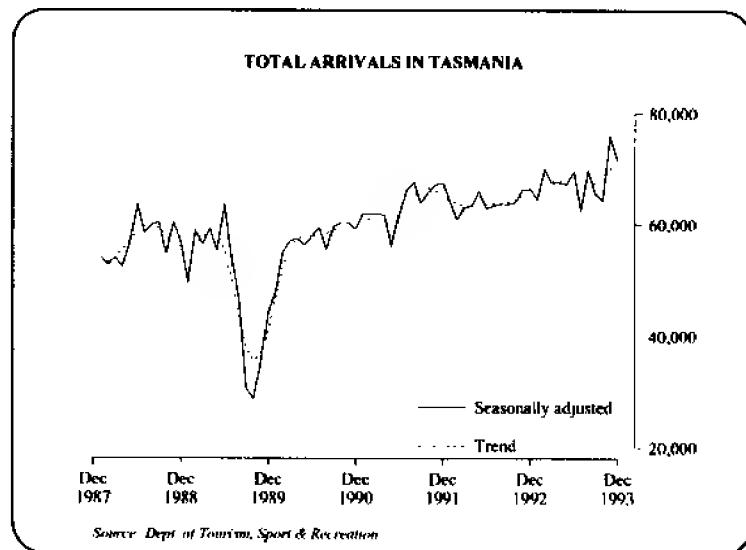

Table 32. Total passenger arrivals by air and sea into Tasmania

Period	Original	Seasonally	
		adjusted (a) (b)	Trend
1992 December	82 262	66 428	66 156
1993 October	65 761	64 403	68 783
November	68 546	75 792	70 087
December	89 795	71 645	71 332

(a) Prior adjustments for the changing dates of Easter have been made.

(b) There is an annual recalculation of seasonal adjustment factors to include the most recent year's arrivals. This occurs at the end of each financial year and may cause revisions to previously published seasonally adjusted and trend figures. A full time series of seasonally adjusted and trend series from January 1971 is available on request telephone (002) 20 5870.
